

Nicolas George After a DUT and a bachelor degree in chemistry at Paris-Saclay University and a master degree in organic chemistry at Sorbonne University, he did a PhD and a postdoc in total synthesis of complex natural substances at the Institute of Chemistry of Natural Substances (ICSN) in Gif-sur-Yvette under the supervision of Dr. Jieping Zhu and Dr. Géraldine Masson and at Imperial College London under the supervision of Prof. Anthony Barrett. After a second short postdoc at ICSN, Nicolas joined the industry, at GSK (Villebon-sur-Yvette), as a challenging target synthesis chemist and then quickly as a medicinal chemist. It was during his master 1 internship at Sanofi in Vitry-sur-Seine that Nicolas was introduced to medicinal chemistry. From that moment on, his university course was chosen to make it his profession. Until 2022, he held the position of project and team leader at Oncodesign (Villebon-sur-Yvette) before joining Aqemia in Decembre 2022. Nicolas is at the origin of the creation of the SCT Young MedChem Forum.
