

Biosketch Dr Guillaume LACONDE

Guillaume is currently research scientist at Oxeltis. He Holds a PhD. from Lille University (Prof. J-P. Henichart) and post-doc from Lille University (Prof. B. Deprez). Prior to Oxeltis, he explored several types of chemicals probes like small molecules, stapled peptides and PROTACs in some industrial or academic labs like SANOFI, INSERM or CNRS. He also founded the company HELIXEM which aimed to develop peptides for the inhibition of protein-protein interaction. He has published more than 30 papers in international peer-reviewed journals and is the inventor of 4 international patents. For 5 years he has been managing a twitter account on PROTAC technology which has an international audience with almost 2000 followers.
